

TENDERLUX 350

TENDERLUX 350 was born to be the natural complement to the new and innovative SEADECK Motoryacht Series, that Azimut has developed with the aim of promoting a conscious return to nature, using highly eco-sustainable technological solutions and stylistic choices that celebrate a lifestyle based on well-being, where the sea is the main protagonist.

TENDERLUX 350, reflecting the SEADECK's essence, features "elegant but minimal" lines that allow this tender to be perfectly integrated into the living spaces of the yacht itself.

Its constructive solutions choose eco-sustainable techniques and natural and recycled materials.

Its finishes are coordinated with those of the yacht it belongs to.

In the FULL ELECTRIC version, this tender requires very little maintenance, offers a very silent navigation and has free access to protected marine areas, where navigation with a traditional thermal engine is forbidden.

Born as a FULL ELECTRIC tender, its declination in an ENDOTHERMIC version will be soon available.

TECHNICAL SPECS

Max Length: 3,37 m
Max Height: 0,79 m
Beam: 1,58 m
Dry Weight: From 360 Kg
Seating: 5
CE Max Load: 4 persons, 340 Kg

ENGINE SYSTEM

MITEK Revolve engine 15 kW
Battery LiFePO4 15 kWh
Outboard rotating system

PERFORMANCE:

Max Speed (1 pax): 17,5 Kts
Consumption: 14,8 kWh
Range: 1 hour at the max speed
